Tampa, FL 33647

Dear Craig,

We have had excellent success working with you and S2 Technologies over the past year and I'd like to recap some of our accomplishments:

- Our utilization of S2 resources to supplement our Customer Support Department has been extremely helpful. Our customers have been highly satisfied with the rapid response time and with the deep product knowledge of the S2 consultants. Overall, our customer support has greatly improved because of our partnership with S2 Technologies.
- Monica Sisk was a very valuable resource as a Senior Analyst on an important client project of ours. She impressed our client with her experience and knowledge and her insightful recommendations helped us to provide the client with the right solutions solve their problems.
- Barbara Gavron implemented Dynamics GP for one of our clients and did so practically single-handedly with professionalism and great skill. This project was a major success and proved to us that we could hand S2 the entire responsibility for an implementation and it would be performed expertly. I'd like to give a special thanks to Barbara who we would definitely ask for again when the opportunity arises.

Once again, Craig, I'd like to thank you for the partnership you and your team have shared with InterDyn AKA. I look forward to more positive achievements in the future.

Warm Regards,

Jack Ades
